

## Aardvark Cone 06-04 Base Glazes

---

**CONE 06 CLEAR:** Designed for oxidation firing with earthenware clays. This base is excellent for solid colors using MASON™ stains. We recommend an addition of approximately seven percent (by dry weight) of the stain of your choice.

**CONE 06 WHITE:** This is a stable, non-leaded, barium free white glaze. Being a stiff, non-moving glaze makes this an ideal base for on-glaze decoration.  
Both low-fire dry bases fit most earthenware bodies with minimal to no crazing.  
This glaze is well suited for use over underglazes by major manufacturers of low fire products. This glaze contains no lead, no barium.

**PRICING:**            1# - \$4.00/lb            5# - \$3.15/lb            10# - \$2.50/lb            50# - \$1.75/lb            100# - \$1.50/lb

## Aardvark Brushing Medium

---

Suspend stains for majolica work.  
Enhance the brushing quality of any dry mix glaze.

**Pint        \$ 3.45**  
**Gallon    \$16.00**
