AMACO POTTER'S CHOICE – CONE 5/6 GLAZES

Cone 5-6 oxidation. They are made for anyone who would like to achieve the Cone 10 reduction effects without having to fire with a reduction atmosphere.

Special application instructions:

PC-20: Blue Rutile needs to be applied heavily. Apply at least four coats. It will flow just a little and create beautiful effects.

PC-50: Shino needs to be applied irregularly. Apply 2 irregular coats. Once you have used it awhile you will see the effects that you can get by varying the application.

PC-60: Salt Buff has to be applied on the thin side. No more than two irregular coats are needed to get the random effect of salt glazing.
